at University of Colorado School of Medicine

Tuesday, February 13, 2018

6:00 pm

at The Daniels Fund

101 Monroe Street, Denver

Room 126

Free parking located at *1st and Madison*

(the gate arm will automatically rise

when you enter the parking lot)

SCHOOL OF MEDICINE

Department of Pathology

UNIVERSITY OF COLORADO ANSCHUTZ MEDICAL CAMPUS

The session will include a discussion of:

- What is pathology and where does it fit into ovarian cancer diagnosis and treatment?
- How does the pathologist diagnose the tumor?
- What is a "frozen section" and why do results sometimes change from the time of surgery to the final answer?
- How long should it take for a pathology result to come back?
- What is a "2nd opinion" and why is it important?

There is no need to register for this event.
